REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: none of the prior art made of record teaches the combined limitations related to an optical scanning device, which includes a hybrid lens for converging the light beam emitted through a first lens in the sub-scanning direction. The hybrid lens comprises a glass cylinder lens made of glass having a positive power in the sub-scanning direction, and a resin lens having a surface whose radius of curvature in the sub-scanning and main scanning direction is varied along the main scanning direction, or whose radius of curvature in the sub-scanning and main scanning direction is varied along the sub-scanning direction.

The cited prior art, Yamawaki et al. (U.S. 6,091,533), discloses an optical scanning device comprising first and second pre-deflection lenses, the second lens having a glass lens and a resin lens, but fails to teach the resin lens having a curvature in the main or sub-scanning direction changing along either scanning direction.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
